

## VICNISS TYPE 1 REPORTS

The VICNISS Coordinating Centre provides all reports for each hospital as an interim measure whilst software is being developed. It is expected that once developed, software will greatly enhance the variety of reports able to be written, and hospitals will be able to write their own reports. Until then, we will continue to provide you with the best reports possible.

### SSI TABLES FOR ALL SURGICAL PROCEDURES

All tables stratified by Risk Index, and rates accompanied by 95% CIs.

1. Quarterly numbers and rates with extra column for numbers of deep SSIs.
2. Cumulative numbers and rates.
3. Annual numbers and rates (by calendar year).
4. Comparison report.
  - a. For THR & TKR, most recent 4 Quarters compared with the VICNISS aggregate cumulative.
  - b. For all others, most recent 2 Quarters compared with the VICNISS aggregate cumulative.
5. The Standardised Infection Ratio report for CSEC to remain, as will the site specific report for CAGS.

### ICU CLABSI and VAP TABLES

1. Quarterly numbers and rates.
2. Cumulative numbers and rates.
3. Annual numbers and rates (by calendar year).
4. Comparison report.
  - a. Most recent 2 Quarters compared with the VICNISS aggregate cumulative.

### NEONATAL ICU TABLES

1. Cumulative numbers and rates with device utilisation ratios.
2. Quarterly numbers and rates.

### HAEMODIALYSIS TABLES

1. Quarterly numbers and rates.
2. Aggregate VICNISS rates

### TYPE 1 DE-IDENTIFIED HOSPITAL DATA REPORTS

1. Quarterly De-identified hospital cumulative numbers and of SSI and CLABSI numbers and rates.
